

## Move at the speed of innovation with Microsoft Azure

Increase your agility and pace of time to market by migrating and modernizing

Staying competitive in today's marketplace requires keeping pace with the latest trends in technology.

**50%**

of CEOs say they've disconnected technology due to the pace of new innovations<sup>1</sup>

**80%**

of organizations believe outdated technology is holding back their progress and innovation efforts<sup>2</sup>

**94%**

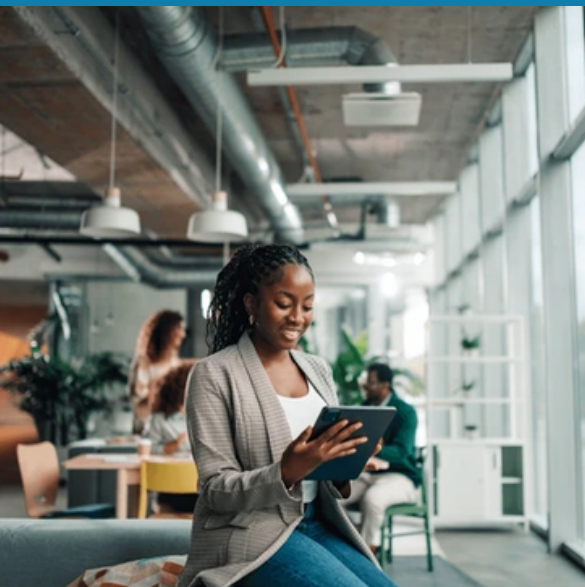

of C-suite executives believe legacy infrastructure is greatly affecting business agility<sup>2</sup>

### Maximize business agility with Azure

Moving workloads to Azure can increase your organization's agility, giving you the flexibility, speed, and scalability you need to adapt quickly to changing market demands and innovate with AI.

Hybrid capabilities help you streamline your existing environment with powerful cloud tools like GitHub Copilot, Azure Arc, and Azure VMware Solution.

Cloud database solutions for Windows Server, Linux, and MySQL offer more support, more efficient operations, and continuous delivery.

### Migrate your workloads for:

- Windows
- Server Linux
- PostgreSQL
- MySQL
- VMware

...and more

**85%**

Less unplanned downtime<sup>3</sup>

**22%**

More productivity for developers<sup>3</sup>

**52%**

faster to scale to meet new business opportunities<sup>3</sup>
